

## **Der Weg einer Freiheit – New Album Tour 2025**

---

Progressive black metal visionaries DER WEG EINER FREIHEIT have consistently transcended the genre's conventions, forging their own path of artistic and emotional expression. With their upcoming, yet to be announced, sixth studio album, the German quartet takes to the stage again to present their new live set that showcases both their profoundness and precision in songwriting—qualities which the band is widely known for.

Formed in 2009 by guitarist and vocalist Nikita Kamprad, DER WEG EINER FREIHEIT has evolved from an underground phenomenon to one of the most revered forces in modern black metal. Through relentless innovation, the band has continuously redefined its sonic landscape, integrating synth elements, progressive structures, and raw, unfiltered emotion.

With the new songs, DER WEG EINER FREIHEIT continues to evolve without compromise. The album will be another testament to their unyielding artistic vision, an echo through the chaos of existence that resonates long after the final note fades into silence. This is not just music; it is an invitation to collectively experience our insides—and perhaps, to discover worlds yet unknown.
